

Grade Report: QNT/575

Grade: A

Grade Summary (Week 1-Week 4)

Total Percentage:	98.35%
Your Total Score:	98.35
Total Possible Score:	100

Week 4

	Possible Score	Your Score
Ethics paper	10.0	10.0
<p>Comment: You have articulated a personal perspective on ethics and research using both personal experiences and other supporting information. The paper reflects your understanding of ethical principles and their importance in educational research. Please use these guiding principles as you conduct research in the field.</p>		
Practice Problems	10.0	8.6
<p>Comment: Please see the comments in the attached document.</p>		
Practical Application Paper	10.0	10.0
<p>Comment: The team has done a good job of demonstrating how to use inferential statistics in a real world application of a research problem. Well done, Team C!</p>		
Week 4 Subtotal :	30	28.6
Cumulative Week 4 Subtotal :	100	98.35

Week 4 Feedback:

Week 3

	Possible Score	Your Score
Discussion Questions 5, 6 & 7	3.0	3.0

Comment:
You make comments that compare and discriminate between ideas; assess value of theories in real world situations; make choices based on reasoned arguments from course content; use old ideas to create new ones, relate knowledge from several areas and predict or draw conclusions for real world situations based

on course content.

Comment:		
Practical Application Paper	10.0	10.0
Comment: The team has done an excellent job demonstrating how to use descriptive statistics in relation to the chosen educational problem. Statistical procedures are correctly applied, and the use of figures in the paper is appropriate and accurate. I was particularly pleased with the level of detail and thought that went into this particular paper. Good work, Team C!		
Zoomerang Results	10.0	10.0
Comment: You have successfully posted the results of the survey that you created and deployed. I hope that you learned a lot as a result of this experience.		
Penny Activity	10.0	10.0
Comment: Great work on this activity! I think that the practical application of this simple exercise using a penny really helps you to understand a lot about statistics. You correctly applied all statistical procedures used for this assignment.		
Week 3 Subtotal :	34	34
Cumulative Week 3 Subtotal :	70	69.75
Week 3 Feedback:		

 Week 2		
	Possible Score	Your Score
Discussion Questions 3 & 4	2.0	2.0
Comment:		
Participation	1.0	1.0
Comment:		
Practical Application Paper	10.0	10.0
Comment: The team has done an excellent job with this paper. The various data collection methods explored should have provided all of you with some good tools for your future research endeavors, especially the action research project. There were minor errors in the paper, but nothing substantial. Good work!		
Application Problems	10.0	10.0
Comment: Good attempt answering the questions and creating the different visual representations of the data! I was lenient in the scoring of this first set of problems for a couple of reasons. First, the syllabus (which was not written by me) was not clear on how to go about creating the histogram, frequency distributions, and stem and leaf display. Usually in the course I teach, I		

make it clear that you are to show the two variable as they related to each other. Many of you looked at them separately. As a result, I am giving credit for the attempt at creating the visual representations. Second, since this was the first go around with using Excel, I wanted to give everyone a chance to get their feet wet without being penalized for some simple mistakes. An answer key will be posted tomorrow evening with the correct answers and sample responses. Please use the answer key to check your work. I welcome any questions.

Week 2 Subtotal :	23	23
Cumulative Week 2 Subtotal :	36	35.75

Week 2 Feedback:

Week 1

	Possible Score	Your Score
Discussion Questions 1 & 2	2.0	2.0

Comment:

I hope the Discussion Questions helped you to understand the concepts a little better.

Participation	1.0	1.0
---------------	-----	-----

Comment:

Your participation was fine for week one. Just continue to make sure that you have 2 responses to others Discussion Questions on 4 out of the 7 days each week. The week starts on Tuesday and ends on Monday.

Survey Article Review	10.0	9.75
